PAIRING OF THE MONTH

Jack the Ripper Natural Cannabis Glass Pen

Celebrate 4/20 in style with our first ever Natural Cannabis Glass vape pen! This pen is equipped with an all-glass cartridge in order to fully appreciate the flavor of the CO2-extracted oil within. The supercritical CO2-extraction method is known for its ability to preserve the unique terpene profile of the strain from which it is extracted. Jack the Ripper is ideally suited to this process, as it has an exceptionally piney and peppery aroma and a sweet citrus and spice flavor. It also possesses potent head and body effects, which are concentrated during the extraction process. Expect to experience moderate muscle relaxation, an uplifted mood, and a calm yet creatively-inclined mind. Due to the ease and discretion of this medication method, there is no better way to commemorate 4/20 anywhere!

RECIPE OF THE MONTH

Suspiciously Devilish Eggs

Ingredients:

- 1 dozen eggs, hard-boiled and peeled
- 1/4 cup Natural CO2 butter, softened
- 1/4 cup mayonnaise
- 1 tablespoon mustard of your choice
- Salt to taste
- Ground pepper to taste
- Paprika and/or dried dill (optional)

Directions:

Finally, something to do with all of those Easter eggs – medicate them! Cut hard-boiled eggs in half lengthwise, and remove yolks without breaking the whites. Mash yolks, and then stir in butter and four following ingredients. Stir in salt and white pepper. Spoon or pipe egg yolk mixture evenly into egg whites. Sprinkle with paprika and/or dill, if desired. Cover and chill for at least one hour.

*Disclaimer: Our new Natural Cannabis Co. CO2 Butter contains 2000 mg of THC per jar, is colorless and produces edibles that are not obviously medicated, so keep these treats out of reach of children and pets.

EDIBLE OF THE MONTH

 **CULTIVATING WISDOM™** APRIL CULTIVATING TIP

SPROUT YOUR GARDEN

Now is the perfect time to start your seedlings! Most cultivators agree that the old-fashioned method of germinating your seeds in damp paper towels is still the best. Store germinating seeds in a cool, dark place, and check them for sprouts that are about ¼ inch in length. When this happens, they will be ready for planting in easily draining soil or peat moss. Be careful not to overwater your seedlings, as they are prone to molding and rotting when they are too wet. Keep new seedlings close to their light source, so they don't stretch too much. Then, enjoy watching them grow up!
